

The following is my execution snapshot. This is run locally on my mac, but I did also test it both in the CSS Linux lab and on my person Linux VM. The snapshot shows the running of the initial command,

`ps -A | grep ssh | wc -l`

and its output, 1. It then shows the running of `processes.cpp`, which also outputs 1, as well as saying “commands completed.”

```
Desktop — zsh — 80x24
Last login: Mon Jul  3 21:30:17 on ttys002
sam@Sams-MacBook-Pro-5 ~ % ps -A | grep ssh | wc -l
1
sam@Sams-MacBook-Pro-5 ~ % cd Desktop; g++ processes.cpp; ./a.out ssh
1
commands completed
sam@Sams-MacBook-Pro-5 Desktop %
```

The following is my illustration of the piping, which is labeled in the photo.
